OVERVIEW

1. Ajaxify Filters is a powerful WooCommerce plugin to filter out products on the fly.
2. Ajaxify Filters lets you apply the filters you need to display the correct WooCommerce variations of the products you are looking for. Choose among color, label, list and dropdown and your WooCommerce filtering search will display those specific products that suit perfectly your needs. An extremely helpful WooCommerce plugin to help customers find what they really want. All this can be done in a quick and very intuitive way that will certainly help your WooCommerce store improve in quality and usability.
3. This plugin provides you widgets that works as a replacement to default WooCommerce-widgets and lets you catch your products on-the-fly without page load.
4. This plugin provides user-friendly as well as SEO-friendly URLs and fetch products for you according to filters chosen by the user using AJAX technique.
5. This plugins offers widgets which is applicable for shop page.

This extension provides various key features:-

1. Category wise filter
2. Attribute wise filter
3. Tag wise filter
4. Price wise filter
5. SEO friendly URLs
6. Avoids headache of page-load and fetch products faster
7. Provides option for admin to decide how to list attributes on front-end
 - (a) List
 - (b) Using color picker setting
 - (c) Check-box

(d) Using Label writing setting

8. Provide widget to show active filters applied so that user can remove them easily.
9. Provide Product Search widget to search product using ajax.
10. Provide widget to save combination of active filters that can be used later to fetch products faster without applying filters again.

Installation

Automatic Installation

Automatic installation is the easiest option as WordPress handles the file transfers itself and you don't need to leave your web browser.

Steps are as follows :

1. To do an automatic install of plugin, Go to <http://cedcommerce.com/> and search the "Ajaxify Filters"
2. Once you've found our plugin you can view details about it such as the the point release, rating and description.
3. You can download the plugin from here and install in your site.

Manual Installation

Manual installation of plugin is another option to install plugin to your WordPress-environment. The manual installation method involves downloading our eCommerce plugin and uploading it to your webserver via your favorite FTP application.

Steps are as follows :

1. Upload the 'Ajaxify Filters' folder to the /wp-content/plugins/ directory.
2. Activate the plugin through the 'Plugins' menu in WordPress.

Widgets provided by Ajaxify Filters

There are 7 widgets provided by “Ajaxify Filters” extension which are as follows:

AJAX Active Filters Shows active filters so users can see and deactivate them.	AJAX Price Filter Shows a price filter slider in a widget which lets you search products based on price.

AJAX Save Active Filters Shows a widget which lets you save applied filter to be used later.	AP : Call to Action A widget that shows Simple Call to Action

1. Ajax Active Filters

This filter shows all the filters applied to search the products. This filter helps you to see filters applied with the option to remove them one at a time or all at once.

This widget allow you to backtrack your product search by removing the active filters one by one.

This widget also allow you to start a fresh product search by removing all active filters at once by the special option provided by the widget, and all that done without page load.

BackEnd:

The screenshot shows a 'Shop Sidebar' panel. Inside, there's a section titled 'AJAX Active Filters: Active Filters'. Below this, there's a 'Title' label and a text input field containing 'Active Filters'. At the bottom left, there are two links: 'Delete' and 'Close'. At the bottom right, there is a blue 'Save' button.

FrontEnd :

The screenshot shows a 'ACTIVE FILTERS' widget. It has a red header bar with the text 'ACTIVE FILTERS'. Below the header, there's a text input field containing 'Remove All Filter Min Price \$10.00'. Below this, there's another text input field containing 'Max Price \$13.00'.

2. Ajax Product Search

This widget allows users to search products by just typing product name in the search-box provided by the widget.

This widget start searching products as soon as user starts typing the keys of keyboard and show you products matching your search just below the search-box without page load.
