OVERVIEW

The **WP Content Scheduler With Range** is a WordPress Plugin to schedule your post or pages between a range of dates. Now users can schedule their post to render at frontend to specific dates. This plugin is also compatible with **WooCommerce**. It means that through this plugin you can schedule your **WooCommerce's** products also to be shown at frontend between specific dates.

This plugin provides various key features:-

Scheduling of Posts:

Through this plugin you can schedule your Posts, Pages, Custom Posts and WooCommerce Products also to be shown between a date-range.

Move to :

There is a feature of **Move To** in this plugin, this feature states that, if the setting of **Move To** is 'trash' or 'draft' then all the scheduled posts will be moved to trash or draft after exceeding its date.

Occasional Content:

This plugin gives a feature of showing occasional content at frontend also. It means you can show some occasional content at frontend. You can show different occasional content for different pages also.

Shortcode :

This plugin gives a feature of creating your own shortcode for displaying the content defined for it, at the frontend for the scheduled time period.

INSTALLATION & ACTIVATION

Installation & Activation is pretty easy in WordPress.

Steps are as follows:

1. Download the plugin from CedCommerce.
2. Go to: Dashboard > Plugins > Add New > Upload and select the .zip file you've downloaded.
3. Click Install Now, and then Activate.

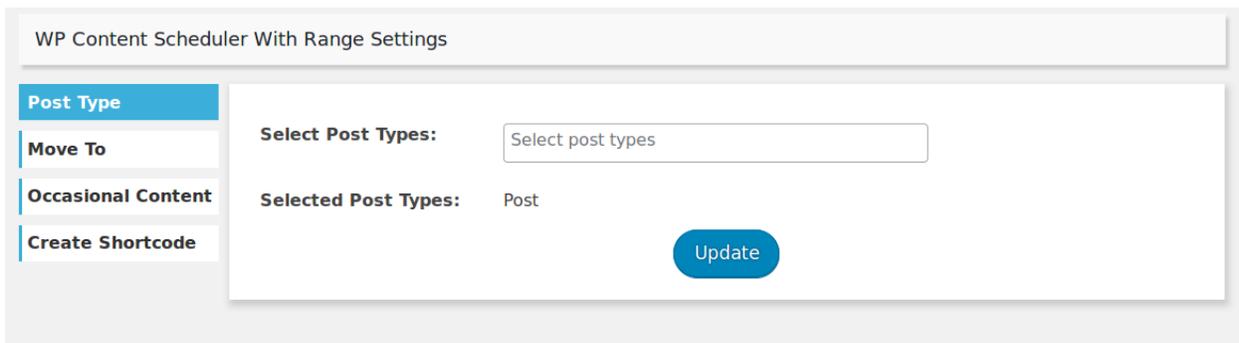

Or

1. Download the plugin from CedCommerce.
2. Unzip the plugin and copy it into `wp-content/plugins` directory.
3. Go to: Plugins > plugin is listed there.
4. Click on Activate.

ADMIN SETTING:

To see the `WP Content Scheduler With Range Configuration Setting` Go to Dashboard > WCSWR.

You'll see a setting page like below in the image:

WP Content Scheduler With Range Settings

Post Type

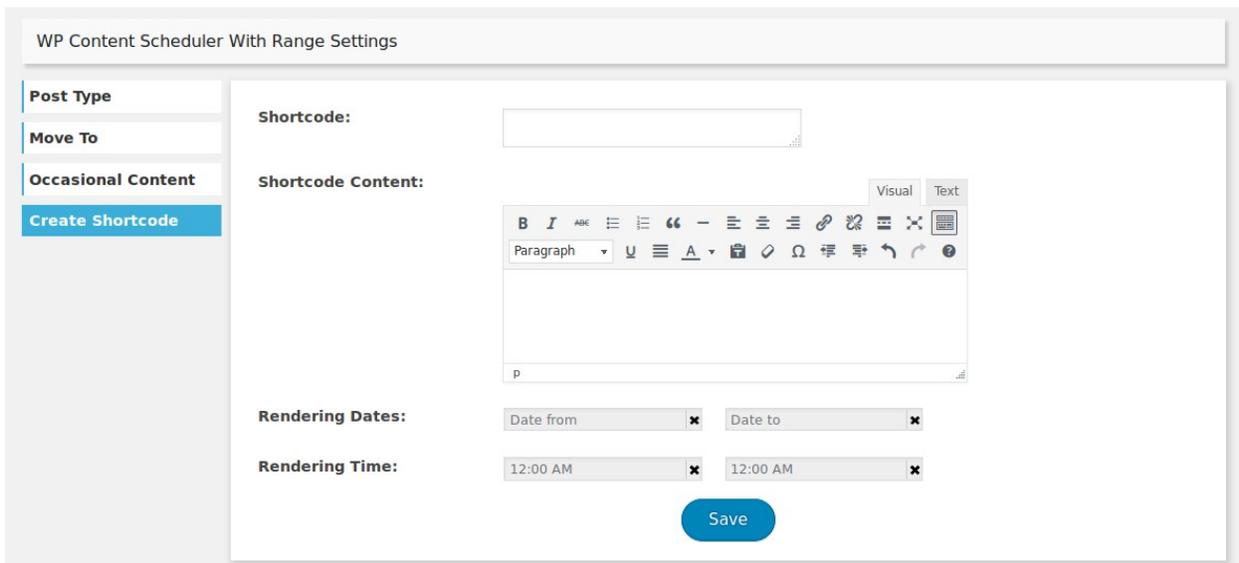

Move To

Occasional Content

Create Shortcode

Select Post Types:

Selected Post Types: Post

WP Content Scheduler With Range Settings

Post Type

Occasional Content

Create Shortcode

Shortcode:

Shortcode Content:

Visual Text

Rendering Dates: Date from Date to

Rendering Time: 12:00 AM 12:00 AM

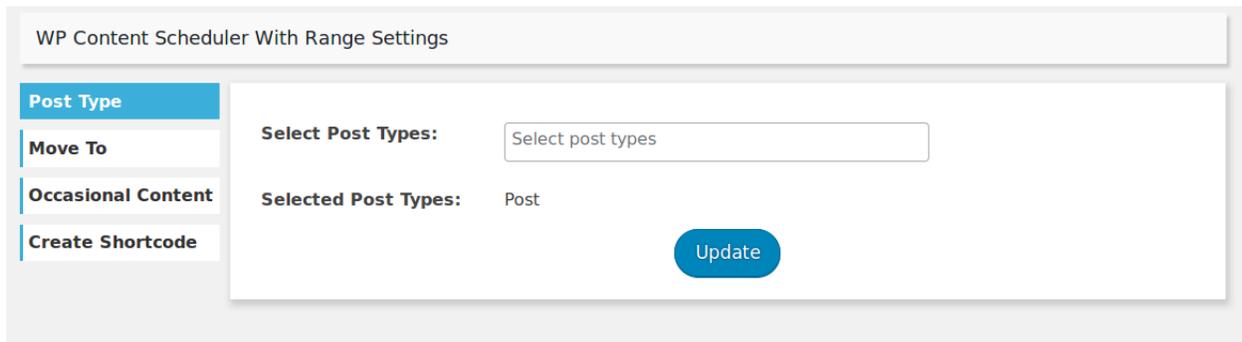

As you can see the images, these are the settings, there is one more image of the settings tabs shown below.

The first and fourth tabs are shown in the image above:

- 1) First is for Post Type Setting.
- 2) And second is for Move to Setting.
- 3) Third tab is Occasional Content Setting.
- 4) Fourth tab is Shortcode Setting.

The configuration and settings are described below:

- 1) Post Type Setting:** The Post Type Setting is a setting for which post type you wish to schedule the content. Click on the text box and you'll be able to see that for how many post type's you can apply the content scheduling. Choose few of them and click on save button. You can choose multiple post types.

WP Content Scheduler With Range Settings

Post Type

Move To

Occasional Content

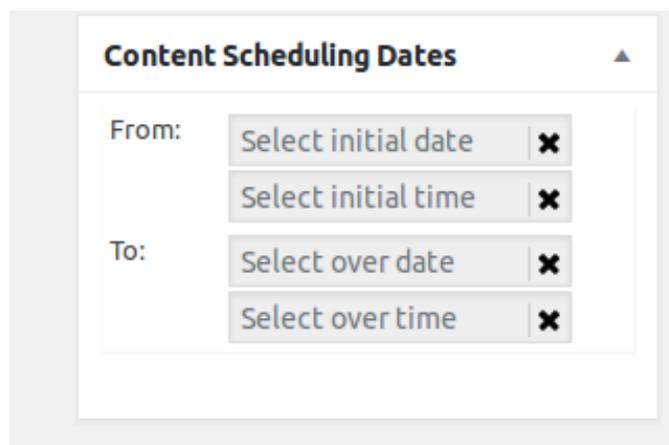

Create Shortcode

Select Post Types:

Selected Post Types: Post

Now you'll be able to schedule your content of these post types. For example, if you've chosen Post, then go to **Dashboard > Posts**. Click on any post you've created and wish to schedule it.

Edit a post and you'll see a section of name Content Scheduling Dates like in the image below.

Content Scheduling Dates

From:

Select initial date

Select initial time

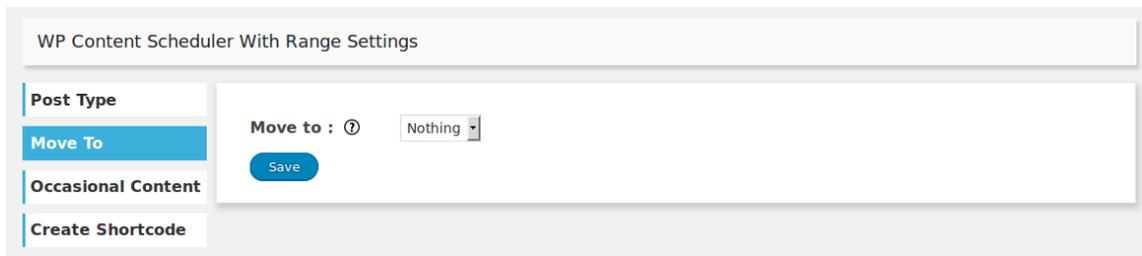

To:

Select over date

Select over time

Select a From date (date from when you wish to show this post at frontend), and a To date (date till when this post you wish to be shown at frontend) by clicking in the from and to text boxes. After that update your post, and now this post is scheduled for the given dates.

- 2) Move to Setting:** The Move to Setting is a setting for moving the post into trash/draft after exceeding its date. If Move to trash/draft is selected and you've saved this setting, then all the scheduled posts will be moved to trash/draft after exceeding its To Date.

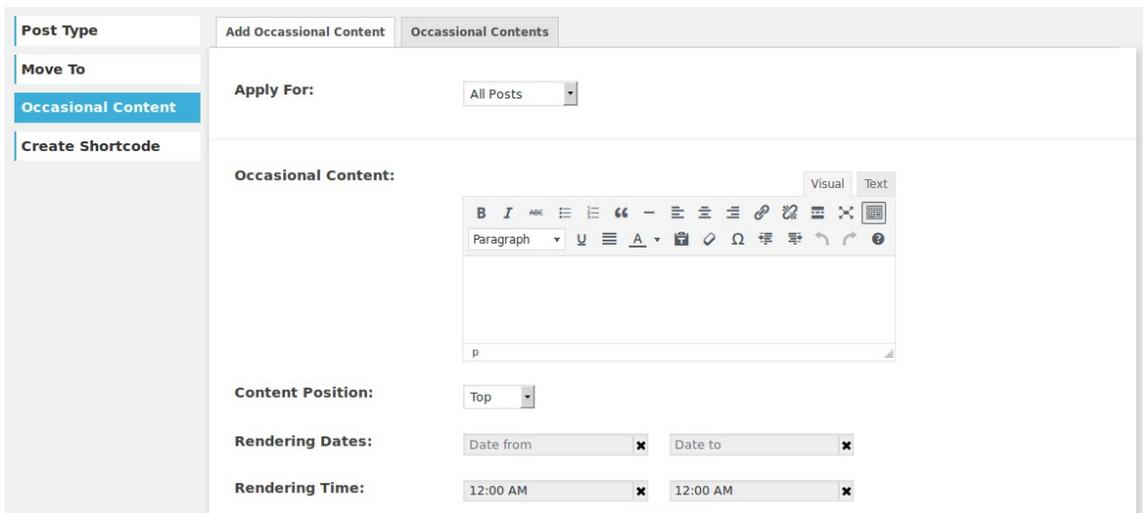

- 3) Occasional Content Setting:** The Occasional Content Setting is a setting for adding some occasional content at frontend, between a date-range. This setting is to show some content at frontend between a date-range.

There are two tabs in Occasional Content Setting:-

Tab 1:- Add occasional content.

Tab 2:- Occasional Contents.

Tab (Add occasional content) : Gives you the options for entering and saving your occasional content.

Apply For: - Choose an option from **Apply For** dropdown. The Apply For option is for, on which page or post you want to show your occasional content. There are 3 options over here, which are described as:

All Posts: If you've chosen "All Posts" then the Occasional content will be shown at each blog's single page.

All Pages: If you've chosen "All Pages" then the Occasional content will be shown at all the pages your site contains.

Specific Pages: If you've chosen "Specific Pages" then a text box will be shown next to that and you can choose, on which pages you can show your content.

Occasional Content: Enter your content in the text box.

Content Position: You can choose an option of Content Position, that where you want to show your content at frontend (either top or bottom).

Rendering Dates: Choose the dates from when and till when you want to show this content at frontend.

Make sure, if the Occasional content contains new line or spaces then it'll be shown at frontend same as it is.

When you've saved your Occasional content setting, then you can see your content at Frontend where you've saved the setting.

The Occasional Content will be shown like:

© 2016 WP Content Scheduler With Range - WordPress
Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

Tab (Occasional Contents) : Shows the list of saved occasional contents.

WP Content Scheduler With Range Settings

Content	Applied For	Content Position	Rendering Dates	Rendering Time
occasional content..	All Posts	Top	2016/11/17 to 2016/11/30	12:00 AM to 12:00 AM

4) Create Shortcode : This feature allows user to create his/her own shortcode which can be used any where to show the given content between specified date-range.

WP Content Scheduler With Range Settings

Shortcode:

Shortcode Content:

Visual Text

B I ABC [List Icons] [Link Icon] [Image Icon] [Table Icon]

Paragraph [Underline] [Text Color] [Background Color] [Link] [Unlink] [Undo] [Redo]

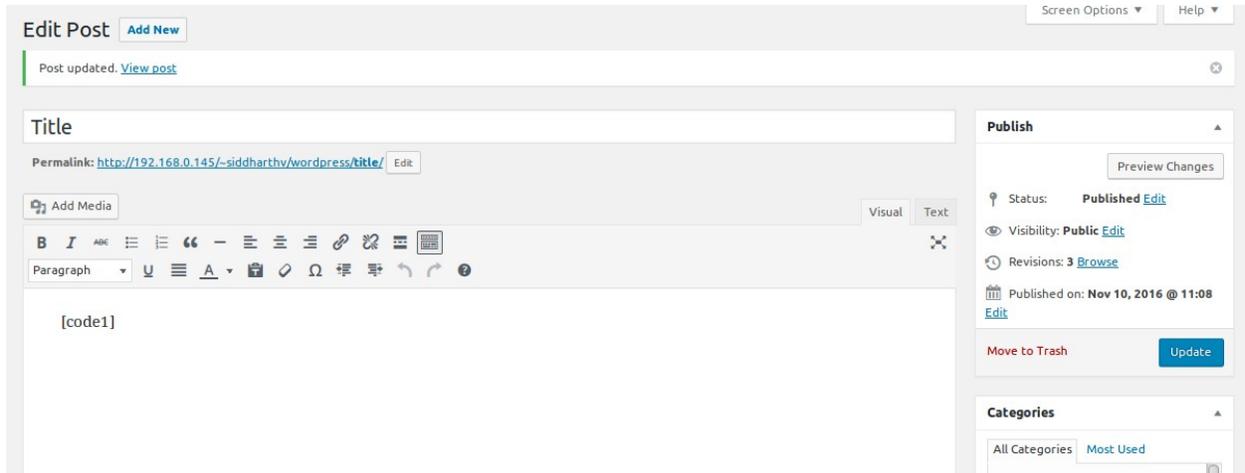

Rendering Dates:

Rendering Time:

If you have created a shortcode named 'code1'.

You can use it anywhere inside square brackets to show your given content.

For eg. [code1]

Post updated. [View post](#)

Edit Post [Add New](#)

Screen Options Help

Title

Permalink: <http://192.168.0.145/~siddharthv/wordpress/title/> Edit

Add Media Visual Text

Paragraph [code1]

Publish

Preview Changes
